Algorithms | Factories | Utilities

Algorithms | **Factories** | Utilities

```java
Set<Integer> set = Collections.singleton(1);
List<String> list = Collections.singletonList("one");
Map<Integer, String> map =
    Collections.singletonMap(1, "one");
```

Singletons

Immutable single value of collection

Use when you want to pass a single value to a method that takes a collection

```java
Set<Integer> set = Collections.emptySet();
List<String> list = Collections.emptyList();
Map<Integer, String> map = Collections.emptyMap();
// and friends ...
```

Empty Collections

Immutable empty collection

Use when you want to pass a no values to a method that takes a collection

Algorithms | Factories | **Utilities**

Summary

This is the end … the only end my friend.
